*Premium  
Vinyl  
Windows  
and Doors  
for New  
Construction  
Applications*

ModernView offers premium windows at competitive prices, just what you would expect from one of the nations leading window suppliers.

ModernView windows are available in a large selection of styles, sizes and construction. We recognize your need for a dependable source of affordable, energy efficient

*Windows of Distinction* products, and that's why we offer the industry's best value in high-performance windows.

ModernView understands your specific market and your needs, that's why we combine the right windows for your market with unparalleled customer service. It's what you've come to expect from ModernView.

### *The Vinyl Advantage*

The window of choice for today's homeowners, vinyl windows are remarkably energy efficient and extremely durable. They require little maintenance, never need painting, conserve energy and save on heating and cooling costs. They are available in a wide variety of styles, shapes, sizes and price points. Today's vinyl windows and patio doors are by far the material of choice for contractors and homeowners alike. And they carry a Limited Lifetime Warranty.

# Series 6000 Windows and Doors

## 6000 Horizontal Rolling Window

- Rolling sash lifts out for safe, easy cleaning from the inside
- Double, steel-reinforced interlocks provide exceptional structural integrity and comforting security
- Positive action cam-lock helps provide a weathertight seal and added security
- Multi-chambered frame assembly improves thermal performance and enhances sound absorbency
- Concealed drainage system keeps rain where it belongs – outside
- Integral, prepunched mounting flange targets proper nail location for quick, easy installation
- Warm-edge, insulated glass technology helps reduce condensation
- Double weatherstrip at interlock prevents air and water infiltration
- High glass-to-frame ratio provides maximum viewing area
- Adjustable tandem wheel and axle assemblies assure smooth easy operation and even reveals
- 3/4" insulated glass provides energy saving, thermal efficiency. Host of other glass options available including Low-E glass and insulating Argon gas
- Precision-mitered, fusion-welded corners block moisture, resists rot and seals out weather
- Choice of White or Almond color options

## 6100 Single Hung Window

- Multi-chambered frame assembly improves thermal performance and enhances sound absorbency
- Contoured glazing stop creates a subtle exterior elegance
- Double steel-reinforced meeting rails provide superior strength and rigidity
- Double silicon-treated fin seal weatherstrip blocks moisture, resists rot and seals out weather
- Removable sash makes it easy to clean the window from the inside
- Warm-edge, insulated glass technology helps reduce condensation
- Concealed drainage system keeps rain where it belongs – outside
- Integral, prepunched mounting flange targets proper nail location for quick, easy installation
- High glass-to-frame ratio provides maximum viewing area
- Positive action cam-lock helps provide a weathertight seal and comforting security
- Integral finger pulls make it easy to open/close window
- 3/4" insulated glass provides energy saving, thermal efficiency. Host of other glass options available including Low-E glass and insulating Argon gas
- Precision-mitered, fusion-welded corners provide superior structural strength and weather resistance
- Choice of White or Almond color options

# Series 7000 Vinyl Windows

## Series 7000 Horizontal Slider Window

- Multi-cavity vinyl chambers help improve thermal performance and structural integrity
- Beveled exterior frame adds a stylish architectural accent
- Double weatherstrip at interlock blocks wind, water and dust infiltration
- 3/4" Insulated glass provides energy saving thermal efficiency
- Gravity controlled, hinge-style weep covers keeps dust out and water drainage clear
- Warm-edge insulated glass enhances thermal performance and reduces condensation
- Optional decorative grids in 3/4" wide flat style
- 3" Frame depth for a heavier, stronger vinyl frame
- Integral nailing-fin with 1" or 1-3/8" setback option for ease of installation in Southwest construction styles. 3/16" stucco key is standard
- Integrated pull-rails on jamb and lead rail provide easy open and close action for the operable sash
- Operating sash glides on 4 brass rollers with stainless steel pins for a smooth effortless operation. Even the largest window will open and close with ease. Adjustable placement settings on roller housings assure level movement of operating sash
- Dual steel-reinforced interlocking meeting rails provide superior structural integrity and reinforce security lock
- Cam-lock assembly anchored in steel for superior durability and comforting security. Meets forced entry requirements
- Interlocking sashes keep both sash units tight and secure, and seal weather out
- Precision-mitered, fusion-welded frame corners provide superior structural strength and weather resistance
- Dual-wall glazing tower adds strength for lasting durability
- Available in White or Almond

## Series 7000 Single Hung Window

- Precision-mitered, fusion-welded frame corners provides superior structural strength and weather resistance
- Block-and-tackle balance system assures ease of operation
- Cam-lock assembly anchored in steel for superior durability and comforting security. Meets forced entry requirements
- Contoured lift rails for easy open and close action
- Gravity controlled, hinge-style weep covers keeps dust out and water drainage clear
- Warm-edge insulated glass enhances thermal performance and reduces condensation
- Optional decorative grids available in 3/4" wide flat style
- Operable bottom sash is removable for easy cleaning
- Fully pocketed sill creates a tighter seal against wind, air and dust infiltration
- Integral nailing-fin with 1" or 1-3/8" setback option for ease of installation in Southwest construction styles. 3/16" stucco key is standard
- Beveled exterior frame adds a stylish architectural accent
- 3" Frame depth for a heavier, stronger vinyl frame
- Dual steel-reinforced installation meeting rails provide superior structural integrity and reinforces security lock
- Dual weatherstripping at interlock helps resist air, water and dust infiltration
- 3/4" Insulated glass panels with Low-E provides energy saving thermal efficiency
- Warm-edge insulated glass reduces condensation and improves thermal performance
- Sloped-sill allows for easy water run-off
- Large, multi-cavity vinyl chambers enhance structural integrity and reduce heat transfer for superior thermal performance
- Available in White or Almond

## Series 7000 Picture Window

- Warm-edge insulated glass enhances thermal performance and reduces condensation
- Consistent reveals provide ample opportunity to combine or stack this picture window with other Series 7000 windows
- 3/4" Insulated glass panels with Low-E provides energy saving thermal efficiency
- Beveled exterior frame adds a stylish architectural accent
- 3" Frame depth for a heavier, stronger frame
- Integral nailing-fin with 1" or 1-3/8" setback option for ease of installation in Southwest construction styles. 3/16" stucco key is standard
- Perfect centerpiece you can flank with a host of other window styles to create a truly captivating vista
- Available in various shapes and sizes up to a maximum of 8' wide x 6' tall
- Gravity controlled hinge-style weep covers keep dust out and water drainage clear
- Precision-mitered /fusion-welded frame corners provides superior structural strength and weather resistance
- Available in White or Almond

# Series 6000 Vinyl Sliding Patio Door

## Series 6000 Vinyl Sliding Patio Door

- Fully welded frame and sash come pre-assembled for easy installation
- Adjustable all-metal tandem rollers assure a smooth, easy door glide
- Easy-to-operate locking handle
- Sliding sash and meeting rail are metal reinforced to ensure rigidity and lasting durability
- High-strength polycarbonate door track for years of performance
- Heavy-duty screen door with no-rust fiberglass mesh
- Integral interior pocket to accept drywall
- Tempered, insulated glass panels provide safety and energy saving thermal efficiency
- Reversible design lets you locate moving sash either left or right

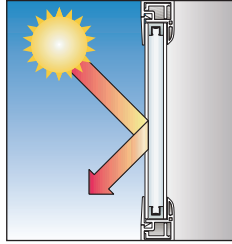

## Special Shapes and Styles

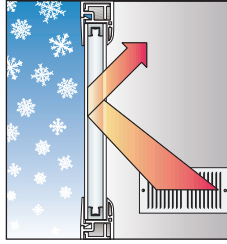

From octagons and trapezoids to full circles, half rounds and eyebrows, we will custom craft any window to make your home as distinctive as you are. Standard sizes are available plus a full range of architectural options to accommodate any style.

## Low-E Glass Technology

Low-E glass is coated with a virtually invisible layer of silver that reflects radiant solar energy while permitting visible light to pass through the glass. In cold, winter climates the Low-E glass helps keep rooms warmer by reflecting heat back into the home while letting warm, solar rays in. In hot, summer temperatures the Low-E glass lets visible light pass while blocking infrared and ultraviolet radiant solar energy. So your rooms stay cooler and you save on precious energy costs. An added bonus of Low-E glass, blocking radiant solar energy, also helps protect room furnishings from fading.

*In the Summer, Low-E glass reduces heat gain from the sun to help keep your home cooler.*

*In the Winter, Low-E glass lets warm solar rays in while blocking heat in your home from getting out.*

ModernView vinyl windows with Low-E glass and insulating Argon gas have earned the Energy Star rating.

## Energy Saving Extras

## A Wise Choice

The majority of our vinyl is compounded and extruded in-house, which allows us to reduce our waste and control our recycling efforts. We recycle our vinyl scrap to maximize yield and minimize the impact on local landfills.

Our lead-free PVC vinyl is not petroleum based, so its production requires no burning and generates no harmful gases.

- Reclaimed glass from external sources makes up to 24-28% of the raw materials used to produce our glass.
- Extended life cycles for many of our windows help save energy in America's homes.

## The ModernView Warranty

You'll like what's behind our windows: a limited lifetime warranty on vinyl, glass, and all working parts. We register each product individually, with its own product identification number (PIN) for easy replacement of parts.

## Warranty

### Kids Can't Fly

*Screens are not designed to restrain a child from falling through an open window. Please take proper precautions.*
