

4900 Series

A Bold Statement

Make a statement with our 4900 Series Collection.

Our double-hung windows feature crisp, traditional lines to define exteriors with classic beauty, while pristine vinyl complements any decor.

With multiple styles available, this window inspires creativity while providing energy-efficiency and ease of maintenance.

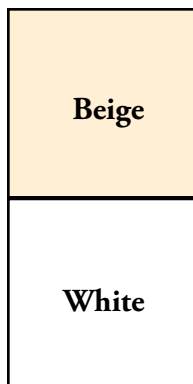

A true slope sill design assures clean appearance, easy maintenance and prevents water accumulation while the fully welded sash and frame provide structural integrity.

Upper and lower sashes tilt-in for easy cleaning from inside the home and recessed tilt latches and extruded lift rail make this window simple to operate.

Made with rigid vinyl lineals and double weather-stripping, air and water infiltration are virtually eliminated while providing excellent thermal properties.

Our Series 4900 double-hungs come complete with standard half or full screens and optional grids between the glass for a more traditional look.

Available styles include double-hung, slider and picture window combinations, as well as special shapes and can be field mulled horizontally and vertically for limitless design possibilities.

Double-Hung with transom and special grids
