

Series 1000 Aluminum Horizontal Slider Windows

Series 1000 Horizontal Slider Window

- Integral nail-fin with 1-3/8" setback
- Weather-strip at interlock helps minimize air, water and dust infiltration
- 15/16" insulated glass provides superior thermal efficiency
- Warm-edge insulated glass reduces condensation and improves thermal performance
- Hollow aluminum extrusions add strength and enhance structural integrity
- Full thermal-break design in main frame and operating sash provides superior energy efficiency and year-round savings
- Recessed dust covers allow proper weeping of window and help reduce dust penetration
- Integrated pull rails provide easy open and close action of operable sash
- Cam-lock provides comforting security and helps assure weather-strip compression. Dual-locks on horizontal sliders 4' or taller
- Every operating sash glides on 4 brass rollers with stainless steel pins for a smooth, effortless operation. Even the largest window will open/close with ease. Adjustable placement settings on roller housings assure level movement of operating sash
- Precision cut aluminum frame secured with plated steel screw fasteners to form a strong durable assembly
- Available in White, Bronze and Sandstone colors
