Series 7000 Horizontal Slider Window

- Multi-cavity vinyl chambers help improve thermal performance and structural integrity
- Beveled exterior frame adds a stylish architectural accent
- Double weather-strip at interlock blocks wind, water and dust infiltration
- 3/4" insulated glass panels with Low-E provides energy saving thermal efficiency
- Gravity controlled, hinge-style weep covers keeps dust out and water drainage clear
- Warm-edge insulated glass enhances thermal performance and reduces condensation
- Optional decorative grids available in 3/4" wide flat style
- 3" frame depth for a heavier, stronger vinyl construction
- Integral nailing-fin with 1" or 1-3/8" setback option for ease of installation in Southwest construction styles: **3/16" stucco key standard**
- Integrated pull rails on jamb and lead rail provide easy open and close action of operable sash
- Every operating sash glides on 4 brass rollers with stainless steel pins for a smooth, effortless operation. Even the largest window will open/close with ease. Adjustable placement settings on roller housings assure level movement of operating sash
- Dual steel reinforced interlocking meeting rails provide superior structural integrity and reinforce security lock
- Cam-lock assembly anchored in steel for superior durability and comforting security. Meets forced entry requirements
- Interlocking sashes keep both sash units tight and secure, and seal weather out
- Precision-mitered/fusion-welded frame corners provide superior structural strength and weather resistance
- Dual-wall glazing tower adds strength for lasting durability
- Available in White or Almond
