*Series 9000 Horizontal Slider Window*

- 1" & 1-3/8" nail-fin setback available to accommodate brick veneer and stucco applications
- Precision cut and assembled aluminum frame and sash reduces air and water infiltration
- 5/8" insulated glass provides energy saving thermal efficiency
- Interior and exterior weather-strip prevents air and water infiltration
- Cam-lock provides comforting security and assures weather-strip compression
- Two integrated pull rails provide easy operation of sash
- Dual weep system with exterior covers removes water from the window while preventing air and dust penetration
- Adjustable dual brass rollers and stainless steel pins provide a smooth open and close action
- Interior compression glazing allows glass replacement from the inside of the home
- Full-screen is a standard feature, allowing ventilation while providing protection against insect infiltration
- Available in many custom shapes and sizes to fit most architectural design
- Available in White, Bronze and Sandstone

Custom Options:

- Decorative internal muntins
- Energy saving Low-E Glass
- Custom sizes available
