R4000 Sliding Patio Door

- Reversible design lets you locate moving panel either left or right
- Adjustable, ball-bearing rollers assure a smooth, ease of operation. Rollers enclosed for added protection from water and dust
- Heavy aluminum assembly for lasting durability
- Tubular construction on lock stile and interlocking stiles for greater strength
- Double weather-strip on jamb and top and bottom rails block wind and water infiltration. Poly-pile weather-strip resists rot/mildew, denser for longer life
- Integral nailing-fin on jambs and head assures ease of installation
- Low-profile threshold for better water run-off
- Inside slide/outside screen
- Optional extra features include: Keyed cylinder lock, insulated Low-E glass, stainless steel track for sliding door roller bearing
- Choice of White, Bronze, Sandstone or Mill Finish color options

Also Available
